awuller@atllp.com

Adam Wuller, a partner in the firm's Intellectual Property practice group, is registered to practice before the U.S. Patent and Trademark Office. His practice involves the preparation and prosecution of U.S. and international patent applications in a wide range of technical disciplines, including mechanical, electrical and medical devices. For example, Adam has extensive experience in preparing and prosecuting patent applications directed to medical imaging devices (e.g., CT and MRI imaging systems), security scanners, implantable neurostimulation systems, optical systems, medical instruments (e.g., syringes, catheters, etc.) and radioisotope elution systems.

Adam's practice also involves preparing noninfringement and invalidity opinions, and undertaking patentability, due diligence and patent landscape analyses for in-house counsel and inventors. In these matters, he assists clients in pre-litigation enforcement of patent rights by performing initial infringement analyses, providing tailored patent enforcement strategies, preparing cease and desist letters and negotiating settlement agreements.

ADMISSIONS

U.S. Patent and Trademark
Office

Missouri

Acquisition of Digital Giving Platform

Represented an information management and payment services client in the acquisition of a digital charitable giving platform, which allows users to make donations to faith-based and nonprofit organizations through multiple channels including a mobile app, donation by text, and at kiosks.

Managed International Patent Portfolio for Health Care Company

Managed U.S. and international patent portfolio related to heart pumps, cardiac catheters, electrocardiograms, heart mapping, heart monitoring and ablation therapy technologies.

Management of U.S. and Foreign Patent Families for Major Medical Device Companies

Managed multiple U.S. and foreign patent families and provided strategic counsel for medical device companies involving technologies related to fluorescent imaging, vascular occlusion, neuromodulation, and renal and cardiovascular devices.

Patent Clearance Projects in Pharmaceutical Industry

Managed several patent clearance projects relating to a computer ecosystem designed to manage the prescription process and use by patients of a multimillion-dollar pharmaceutical product.

Patent Landscape Analysis for Fintech Client

Conducted patent landscape analyses and ideation sessions for a large fintech client in the area of authenticating online users.

Payment Authentication Patent Portfolio for Fintech Client

Developed patent portfolio for large fintech client in the area of payment authentication services. Multiple patent attorneys prepared and filed numerous patent applications directed to authenticating online users using client device metadata.

IP Due Diligence for \$900 Million Business Acquisition

Handled the IP due diligence for a client that acquired a payments technology company valued at about \$900 million.

Patent Portfolio Generation in Power Supply Architectures

I prepared and filed a number of patent applications to generate a robust patent portfolio directed to particular types of power supply architectures. I also performed analyses of competitor IP related to those power supply architectures.

IP Due Diligence in \$3.4 Billion Acquisition of Medical Device Manufacturer

Led IP due diligence for a major medical device company, including in-depth research and analysis of both the target company and its competitors, resulting in our client's decision to move ahead with its \$3.4 billion acquisition of a medical device manufacturer.
