

BIOTECHNOLOGY

Armstrong Teasdale represents some of the largest biotechnology and life sciences companies in the world, providing counsel on all types of intellectual property matters, including those involving acquisitions, strategic patent counseling, regulatory compliance and dispute resolution. Our highly qualified professionals include eight lawyers and patent agents with Ph.D.s, and numerous biomedical, chemical, mechanical and genetic engineers.

Given the broad range of scientific, technical and medical backgrounds our lawyers possess, we can provide clients with integrated legal representation based on our in-depth understanding of the science behind our clients' work and the law. Our cross-border team of patent professionals regularly provides global patent portfolio management services, from prosecution to post-grant proceedings, to biotech clients, ensuring their intellectual property is protected from every conceivable angle. Clients include both Fortune 100 firms working in the medical, pharmaceutical, industrial and consumer/commercial fields, as well as startups, universities and research institutions, and governmental entities, including the National Institutes of Health.

Collaborating with professionals across the firm's practice areas, the team offers seamless support to biotech clients in every aspect of their business and helps them transform their innovations into thriving enterprises.

EXPERIENCE

Counsel for Biotech Company from Acquisition to Environmental Mitigation

Counseled biotechnology company in acquisition, financing and construction of new research lab facility. Resolved environmental challenges through post-closing escrow agreements.
