

CHRISTOPHER JANDA-FORNER

EDISCOVERY PROJECT MANAGER

Chicago, IL

312.516.5607

cforner@atllp.com

Christopher Janda-Forner supports litigation case teams across all phases of the Electronic Discovery Reference Model (EDRM).

With extensive experience in e-discovery and data processing, he delivers comprehensive project management through the design, administration, and implementation of sophisticated electronic document review databases. Christopher supports litigation teams through the discovery life cycle by assisting with data collections, developing complex search strategies, managing large-scale document reviews, and preparing defensible productions. He is frequently engaged in early case assessment (ECA) planning and the development of technology-assisted review (TAR) workflows, helping case teams achieve efficient, defensible, and cost-effective document review processes.

Christopher has broad experience working with a wide range of litigation support and document review platforms, including Relativity, CloudNine Review, OpenText, Concordance, LAW PreDiscovery, West Case Notebook, Opus, and TextMap.

BACKGROUND

Christopher previously served as a Litigation Support Specialist at Novack and Macey in Chicago, and joined Armstrong Teasdale in 2023 as a Senior Paralegal. Earlier in his career, he worked as a paralegal at several Chicago law firms, supporting complex commercial litigation matters.
